

IEWatch Software LLC

IEWatch - The essential web development tool

January, 2007

For Immediate Release

Contact: press@iewatch.com

Carlsbad, CA (Jan. 2007) - IEWatch Software LLC, a leading provider of internet solutions has released IEWatch Professional 4.5, a plug-in for Microsoft Internet Explorer that helps you achieve your web development and analysis tasks more efficiently.

Combining power and flexibility with ease of use, IEWatch appeals to an entire spectrum of web professionals:

- Web Developers can debug the HTTP and HTTPS traffic and analyze Cookies, POST and GET information or locate HTML code by directly clicking in the web page (Patent Pending).
- JavaScript and Ajax developers can quickly test scripts against a production web page without having to modify the server source code.
- Web Analysts can dissect the HTTP traffic related to web analysis tracking code, using the powerful filter and search capabilities.
- Web Site Designers generally have to provide many mockups before receiving a final approval. With IEWatch, you can create prototypes by quickly modifying any existing web page on the internet.
- System Administrators can analyze HTTP data and identify performance bottlenecks by using the HTTP performance chart.
- Quality Assurance Engineers can use this tool to dig deep into the inner workings of web applications to find hidden issues. IEWatch makes the inner workings of a web site transparent, allowing you to isolate issues and verify the data security of web sites.

IEWatch has been featured in Microsoft Developer (MSDN) magazine and has received 5star and editor choice ratings from major software download sites. Businesses around the world including many Fortune 500 companies are taking advantage of accelerating their web development with IEWatch.

System requirements are Windows® 2000 or higher and Internet Explorer® 6 or higher. The price of a single user license is US\$ 169.00.

A 30-day fully functional evaluation copy of the product is available at:
