

IEWatch Software LLC

IEWatch - The essential web development tool

April, 2009

For Immediate Release

Contact: press@iewatch.com

San Francisco, CA (Apr. 2009) - IEWatch Software LLC, a leading provider of internet solutions has released IEWatch Professional 5.0, a plug-in for Microsoft Internet Explorer that helps you achieve your web development and analysis tasks more efficiently.

Many new features have been added to IEWatch Professional 5.0 including:

- Improved rapid prototyping and a integrated diff tool to track the changes you made to a HTML, CSS or JavaScript document.
- A unique, ultra fast HTML Analysis search feature allows you to quickly find information in the rendered HTML documents and all associated resources.
- New functions to manage Cookies and Cache entries.
- You can now use Regular Expressions for complex searches in the HTTP Log.
- The "View in External Application" function allows you to use your favorite application to view HTML, CSS and JavaScript.
- You can add HTTP request header(s) for simulation purposes and to trigger functions on the server.
- New function to quickly find a class definition in the Style Sheets.
- Support of Internet Explorer 8.
- And many other new features and enhancements...

IEWatch has been featured in Microsoft Developer (MSDN) magazine and has received 5star and editor choice ratings from major software download sites. Businesses around the world including many Fortune 500 companies are taking advantage of accelerating their web development with IEWatch.

System requirements are Windows® 2000 or higher and Internet Explorer® 6 or higher. The price of a single user license is US\$ 169.00.

A 30-day fully functional evaluation copy of the product is available at:
